Professional Experience

01/2022 – 01/2026
Pune

Infosys Limited

Salesforce Quality Analyst

- Led the Salesforce CPQ QA Team, ensuring high-quality deliverables for complex Salesforce CPQ implementations.
- Created and executed detailed test plans and test cases for Salesforce CPQ covering functional, regression, and UAT testing
- Conducted end-to-end testing of quote-to-cash processes, including product bundling, pricing, discounting, and eligibility verification.
- Collaborated with cross-functional teams, including developers, business analysts, and clients, to identify and resolve system issues.
- Utilized Selenium WebDriver for automation testing to enhance testing efficiency and accuracy.
- Managed daily client communications, providing updates on testing progress, defect resolutions, and quality assurance metrics.
- Validated CPQ configuration rules, price rules, and approval processes to ensure accurate business logic implementation.
- Providing support during production releases, validating key business processes and ensuring smooth transitions with minimal disruptions.
- Supported data migration activities by validating data accuracy and consistency during system transitions.
- Verified Salesforce integrations with third-party systems, ensuring seamless data flow and functionality.
- Provided training and mentoring to junior QA team members, enhancing team capability and performance.
